

# CLIPMIND AI

AI Video Summarization & Key  
Moment Detection Platform

**MILESTONE 2**

# OBJECTIVE

Develop the AI pipeline that:

## Goal

Reduce the time required to understand long videos by providing concise summaries.

# Features Implemented

## Transcript Generation

- Video audio extraction
- Speech-to-Text conversion
- Transcript generation
- Transcript editing
- Transcript storage

## AI Summarization

- Short Summary
- Detailed Summary
- Key Points Extraction

# Workflow

Extract Audio

Generate Transcript

AI Summarization

User Uploads  
Video

Whisper Speech-  
to-Text

Store Transcript

Display Summary

# Technology Stack

# Transcript Generation

## Steps

- Extract audio from uploaded video
- Send audio to Whisper
- Convert speech into text
- Save transcript

## Output

- Complete transcript
- Editable text
- Timestamp support (optional)

# AI Summarization

Input  
Transcript

Final Summary

Preprocessing

Transformer Model

Types :  
Short Summary  
Detailed Summary  
Bullet Point Summary

# Results

## Outputs Generated

- Transcript created successfully
- AI summary generated
- Reduced reading time
- Improved content understanding

### Sample Output

#### Transcript

"Today we will learn about Artificial Intelligence..."

#### Summary

"The video introduces AI concepts, applications, and future scope."

The screenshot displays the ClipMind AI interface. At the top, there is a search bar with the text "Ask ClipMind or search videos, transcripts..." and a user profile for "Dipanshivarma06" with the role "Learner". Below the search bar, the title "Product Launch Keynote 2026" is prominently displayed, along with a star icon and the label "AI SUMMARY". To the right of the title are buttons for "Copy" and "Share". Below the title, it states "Generated 2 minutes ago • 42 minutes of video". The main content area is divided into three sections: "OVERVIEW", "KEY POINTS", and "ACTION ITEMS". The "OVERVIEW" section contains a paragraph about transformer-based models. The "KEY POINTS" section lists three bullet points about long-context transformers, real-time summarization, and instant chapters. The "ACTION ITEMS" section lists three tasks with checkboxes, including shipping chapter generation, running a cohort study, and publishing a benchmark.

Ask ClipMind or search videos, transcripts...

☆ AI SUMMARY

Product Launch Keynote 2026

Generated 2 minutes ago • 42 minutes of video

Copy Share

OVERVIEW

A deep conversation on how modern transformer-based models are turning long-form video into structured, searchable knowledge. The guest explains why summarization has moved from a post-production step to a real-time capability, and outlines the product opportunities unlocked by hour-long context windows.

KEY POINTS

- Long-context transformers enable single-pass processing of hour-long recordings.
- Real-time summarization changes video from a linear medium into a queryable database.
- Instant chapters and action items drive 2× engagement in

ACTION ITEMS

- ☐ Ship instant chapter generation to all workspaces by end of month.
- ☐ Run cohort study on action-item click-through rates.
- ☐ Publish benchmark comparing our long-context pipeline to open-source baselines.

# Challenges & Solutions

## Challenges

- Background noise
- Long video processing
- Large transcript size
- Summary quality

## Solutions

- Whisper for robust speech recognition
- Transformer models for summarization
- Text preprocessing
- Efficient transcript storage

# Conclusion & Next Milestone

## Milestone 2 Completed

- Transcript Generation
- AI Summarization
- Transcript Storage
- NLP Integration

## Next Milestone

- Key Moments Detection
- Timestamp extraction
- Highlight detection
- Analytics Dashboard
- Keyword Extraction

# THANK YOU

Turning long-form videos into meaningful insights with AI.
