

CLIPMIND AI

AI Video Summarization & Key
Moment Detection Platform

MILESTONE 4

OBJECTIVE

Testing & Validation

- Validate complete platform workflows
- Test AI-generated transcripts and summaries
- Verify key moment and keyword extraction

Optimization

- Improve video processing efficiency
- Improve API response and dashboard performance

Deployment

- Prepare Docker-based deployment
- Integrate frontend, backend and AI services
- Finalize documentation and demonstration

Features Implemented

Functional Testing

- Authentication & role-based access
- Video upload and processing
- Transcript generation
- Summary generation

AI Validation

- Transcript quality
- Summary relevance
- Key moment detection
- Keyword extraction

Integration Testing

- Frontend-backend communication
- API workflows
- Error handling
- End-to-end processing

PERFORMANCE OPTIMIZATION

Video Processing
Optimized processing
workflows

API Performance
Improved request
handling and response
flow

Dashboard
Improved loading and
responsiveness

AI Pipeline
Streamlined
transcription and
summarization

Workflow

VIDEO PROCESSING

TRANSCRIPTION

KEY MOMENTS

ANALYTICS

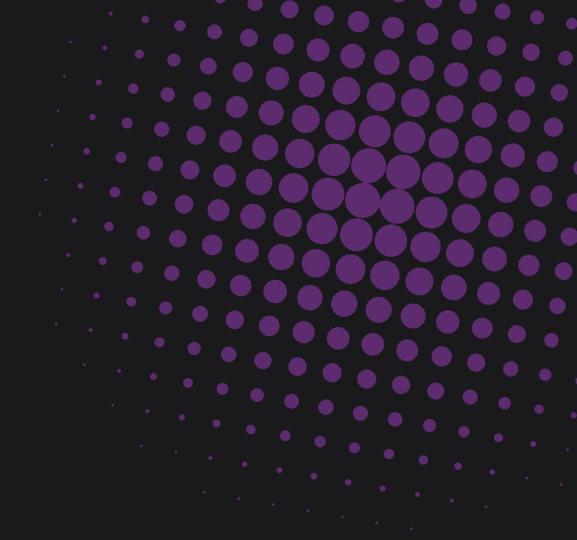

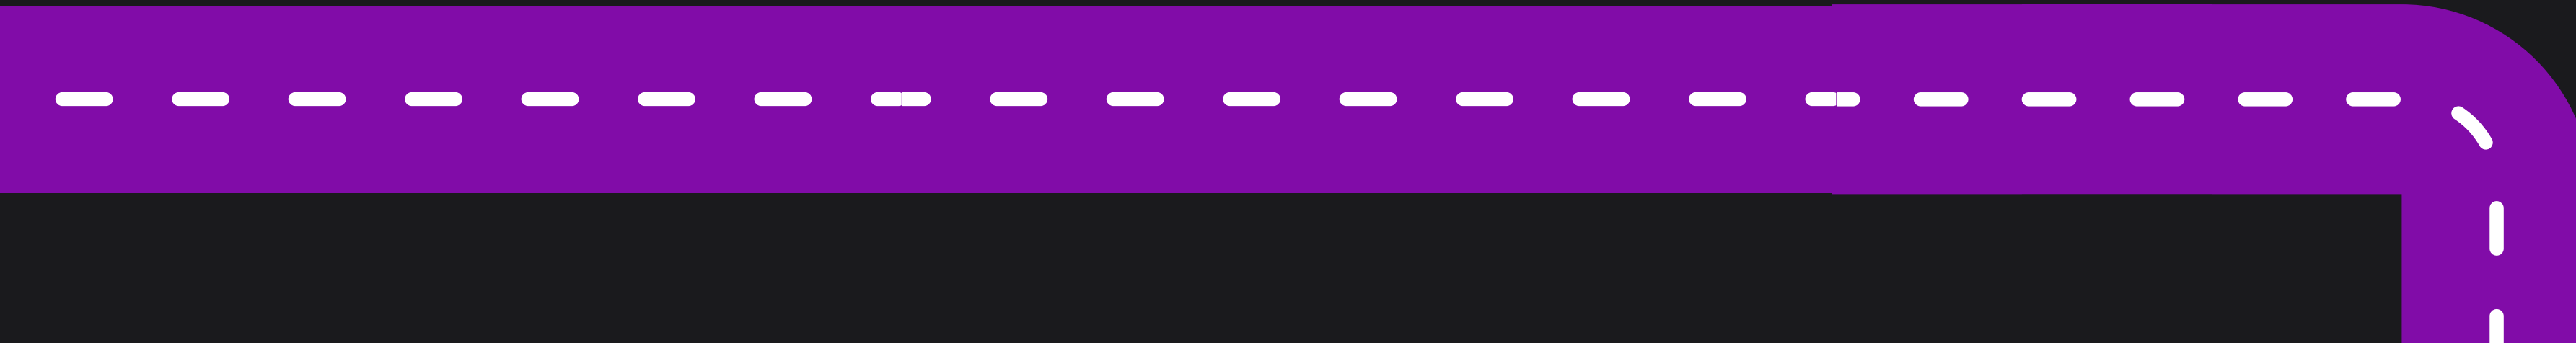

RESULTS & FINAL OUTCOME

AI Intelligence

- Speech-to-text transcription
- AI-powered summaries
- Key moment detection
- Keyword extraction

Platform

- Role-based access
- Video management
- Analytics dashboard
- Integrated AI workflow

THANK YOU

Turning long-form videos into meaningful insights with AI.
